

Power BI for New Report Users:

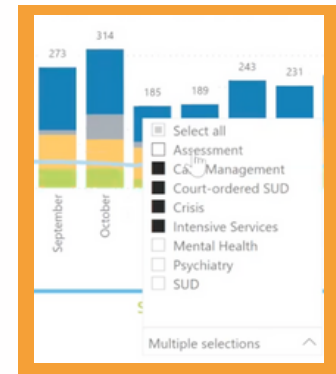

super easy steps for 'Non-Data' People to become Data Superheroes

Here are some 5 tips and tricks from our live webinar, including a timestamp to the point in the webinar where Ginger walks through the topic.

1. The reset button is useful to return your report to it's initial state [11:24]

2. Hold CTRL to multiselect filters / slicers in a report [13:25]

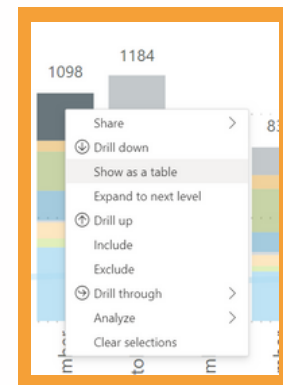

3. Clicking on an underlined hyperlink can link to live Credible Data [27:01]

Client ID	Service ID	Date of Service	Program	Location
281692	12987684	6/30/21	Mental Health	Office
273293	25355119	6/18/21	Mental Health	Office
280586	38862620	6/30/21	Mental Health	Office
209772	54391007	6/30/21	Mental Health	Office
241814	62707533	6/25/21	Mental Health	Office

4. Right clicking on a report can reveal more options available

5. When to ask for changes in a report? Below are some examples of good reasons to reach out to your data team, to request adjustments in a report. [38:25]

- Do you find yourself doing lots of additional math on the side?
- Are you exporting things to Excel to do additional manipulations?
- Is there something unnecessary that you filter out every time you use the report?

MISSION DRIVEN DATA
